

## TOOLBOX COMMANDS

The DeluxePaint/PyDpainter philosophy is that shortcuts are direct: hit the key. Even while drawing !  
Letters and symbols in brackets indicate the keyboard shortcut.  
Shift pressed is often a variant of the same tool.

Some functions exists only as shortcuts, with no menu or toolbox equivalent.

*RC stands for Right Click with the mouse on the tool button. Usually allow access for parameter. LC stands for Left Click with the mouse on the tool button.*

This should not be confused with the right button while drawing, which uses the selected tool with the current background color (black by default).

Single pixel brush [.]

**Stroke, dotted freehand [s]**

Straight Line [v]

**Fill [f]**
