TOOLBOX COMMANDS

The **DeluxePaint/PyDpainter** philosophy is that shortcuts are direct: hit the key. Even while drawing !
Letters and symbols in brackets indicate the keyboard shortcut. Shift pressed is often a variant of the same tool.

*RC stands for **Right Click** with the mouse on the tool button. Usually allow access for parameter. LC stands for **Left Click** with the mouse on the tool button.*

This should not be confused with the right button while drawing, which uses the selected tool with the current background color (black by default).

Single pixel brush [.]

Use the mouse wheel over this area to adjust the size of the brush. [+] and [-]

Stroke, dotted freehand [s]

Draw [d] / Filled area [D]
